7.	Evaluating the Impact of SDG Indicators	3
8.	Healing Systems for Livability: 5Ps Unleashed	3
9.	The 5P Odyssey: Navigating Towards a Livable Planet	3
10.	Systems Thinking for a Sustainable Future	4
11.	The Power of Partnerships: Systems Thinking for Collaboration	4
12.	Advancing the 5Ps: Livable Planet Goals	4

Course Outline

1. Systems Thinking for Sustainable Development

- **Objective:** Dive into systems thinking for Sustainable Development.
- **Audience:** UN staff and civil society members.
- **Method:** Interactive lectures, readings, and assignments.

2. Mastering the 5Ps with Systems Thinking

- **Objective:** Explore systems thinking strategies for the 5Ps.
- **Audience:** UN staff from headquarters, country teams, or regional offices.
- **Method:** Group projects, games, and guest lectures.

3. Practitioner's Guide to Systems Thinking and the 2030 Agenda

- **Objective:** Equip practitioners with tools for the 2030 Agenda.
- **Audience:** Country teams, government reps, civil society, private sector, academia, and foundations.
- **Method:** Workshops, problem-solving activities, peer learning.

4. Everyday Systems Thinking

- **Objective:** Cultivate systems thinking habits and apply them in daily life.
- **Audience:** Change-makers from the UN, government, civil society, private sector, academia, and foundations.
- **Method:** Real-world examples, discussions, and exercises.

5. Systems Thinking as a Theory of Change

- **Objective:** Develop a theory of change using systems thinking.
- **Audience:** UN staff, government reps, development practitioners, and civil society.
- **Method:** Lectures, DIY protocols, guest lectures, and group exercises.

6. Healing Systems for Livability: Systems Leadership for SDG Policy

- **Objective:** Apply systems thinking and healing systems for livability in SDG policymaking.
- **Audience:** UN staff, government reps, development practitioners, and civil society.
- **Method:** Leadership exercises, policy analysis, peer learning.

7. Evaluating the Impact of SDG Indicators

- **Objective:** Measure and evaluate SDG indicators from a systems perspective.
- **Audience:** UN staff, government reps, development practitioners, and civil society.
- **Method:** Lectures, data analysis, and group projects.

8. Healing Systems for Livability: 5Ps Unleashed

- **Objective:** Transform the 5Ps into a blueprint for a livable planet.
- **Audience:** Global change-makers from the UN, government, civil society, private sector, academia, and foundations.
- **Method:** Collaborative exercises.

9. The 5P Odyssey: Navigating Towards a Livable Planet

- **Objective:** Use systems thinking to chart policies for livability.
- **Audience:** Government, NGO, and corporate leaders.
- **Method:** Hands-on exercises, peer learning, breakout sessions.

10. Systems Thinking for a Sustainable Future

- **Objective:** Unravel interconnectedness and identify places to intervene for change.
- **Audience:** Policymakers, educators, and sustainability enthusiasts.
- **Method:** Discussions and group activities.

11. The Power of Partnerships: Systems Thinking for Collaboration

- **Objective:** Highlight systems thinking in partnerships.
- **Audience:** NGOs, corporations, and government agencies.
- **Method:** Theory exploration, real-world examples, breakout exercises.

12. Advancing the 5Ps: Livable Planet Goals

- **Objective:** Revolutionize the 'Planet' goals of the 5Ps.
- **Audience:** Global stakeholders committed to creating a livable planet.
- **Method:** Dialogues and breakout sessions.
